What are you waiting for?™

Long wait times? Unhappy guests?
Slow servers? Lost pagers?

No matter what type of restaurant
you operate, no matter what
problems you face, we have the
solutions you need.

LRS products will help you
streamline and simplify your
guest and server management
at every level of your operation.

They'll help you turn tables
faster, increase check averages,
improve server performance and
promote guest satisfaction.

Every time.

*Established in 1993, LRS is the leading
innovator of guest and staff paging
and management systems all over
the world.*

- Key Call™ Electronic Table Locator** Pg 18
Serve guests faster with fewer food runners.
- EZ Card™ Gift Card Dispenser** Pg 24
Increase gift card sales without interrupting your staff.

EXCLUSIVE PRODUCTS & SERVICES

Cell-Phone Paging (Page 8)

A revolution in paging! Our T7450 guest paging transmitter also lets you page guests on their cell phones with a pre-recorded message when their table is ready. Cell-phone paging is ideal for malls, strip centers, waterfronts or anywhere else pager loss is a concern.

Themed Guest Pagers (Page 4)

Perfect for Italian and seafood restaurants, you can only get these fun and distinctive pizza and lobster pagers from LRS. We'll be offering other exclusive shaped pagers in the future.

Bulldog™ Pager-Alert System (Page 18)

Keep a leash on your pagers. The new Bulldog is the perfect way to help stop servers and guests from walking off with pagers. Just place this tiny unit over an exit doorway. If someone walks through with a pager, the pager will start to vibrate or flash until it's returned.

Beach Butler™ Beach/Poolside Paging (Page 22)

Guests can use the convenient Beach Butler system to instantly contact a server when they need service on the beach or poolside. It's 100% weatherproof and made of heavy-duty Lexan thermoplastic so it can be used anywhere — indoors or outdoors. Plus, this "on-demand" service means more sales for you.

Key Call™ Table Locator System (Page 18)

Serve guests faster and reduce labor costs. This innovative unit lets fast casual food runners know where guests are sitting *before* they leave the pickup area. Faster service means you serve more people in less time and you need fewer runners per shift.

Electronic Comment Card (Page 14)

This powerful, easy-to-use survey program provides instant feedback from 75 to 85% of your guests EVERYDAY. It's also the only survey system that lets managers know if a guest enters a negative response *before* they leave the restaurant.

EZ Card™ Gift Card Dispenser (Page 24)

Increase gift card purchases all year round with EZ Card, the convenient, automated gift card dispenser. This self-service unit lets your guests purchase cards of any amount any time they want without interrupting your server or cashier.

GUEST-PAGING

Seat People Quickly, Serve Food Faster and Reduce Walk-Aways

In full-service restaurants these silent on-site pagers let guests know the moment their table is ready. In fast casual restaurants they let them know when their food is ready to pick up. Either way, they help you serve your guests faster so you increase table turns and reduce walk-aways.

Why You Need Them for Full Service:

- Seat guests faster by letting them know when their table is ready
- Eliminate hostess stand congestion
- Reduce walk aways
- Increase table turns by seating guests faster
- Silent paging eliminates overhead paging for a quieter, more relaxed atmosphere

Why You Need Them for Fast Casual:

- Let guests know the moment their food is ready
- Increase table turns by serving more guests in less time
- Silent paging eliminates overhead paging and calling of numbers when orders are ready

System Features:

- Highest quality, most durable pagers available
- Our proprietary protocol lets us repeat a signal so you get unlimited range
- Rechargeable NiMH batteries last years longer with no "memory" problems
- Multiple alert modes (vibration, flash, beep and glow) are impossible to miss
- Anti-theft & Auto-locate minimizes pager loss
- Unique restaurant IDs eliminate interference from neighboring restaurant paging systems
- FCC & CE approved

Coaster Call®

Our Most Popular Pager — For a Good Reason

The world's first guest pager in the shape of a drink coaster! A unique bumper ring makes it virtually indestructible. Available colors: Smoked with red lights, green and blue.

Coasters have our durable M-Pack™ Bumper Guard and a front number label

Alpha Coaster™

Update guests on their wait time and promote specials

Our newest innovative pager works just like our popular coaster pagers, plus, they let you send text messages to your guests. Give them updates on their wait time, and promote your daily specials. Available colors: Blue and smoked with red lights.

Patented charging system features any-orientation stacking

Patented charging system features any-orientation stacking

TRANSMITTERS

T7400

- UHF transmitter
- FCC & CE approved

T7450 - The Trinity

- UHF transmitter
- Patented technology also pages guest cell phones (Page 6)
- FCC & CE approved

Both transmitters work with all our guest pagers and our server pagers (Page 8).

CUSTOM COASTER LABELS

Use these durable, waterproof labels to promote specials, advertise new items, or just add your restaurant logo.

Double-sided space can hold inserts for restaurant promotions and vendor advertising

Pizza Pager™

The Tastiest Looking Pager Available

The only one of its kind, this pager looks as good as it works. Designed especially for Italian restaurants and pizzerias, it looks just like a slice of pizza with pepperoni, mushrooms and green peppers.

Charging system features stackable pizza pagers

Patented

Lobster Call™

Guests Will Love This Snappy Looking Pager

The first guest pager in the shape of a lobster is ideal for seafood restaurants. It features red lights with a frosted maroon case. To help prevent theft, it's the largest pager on the market, yet still easy to carry.

Charging system features stackable Lobsters

Patented

AdverTeaser®

Pages Guests and Promotes Your Restaurant

Guests will never miss a page with this UHF paddle pager. It features four bright red LED lights and the strongest vibration on the market. It's also the first paddle pager with a double-sided space for advertising your restaurant. Easy to carry and a sturdy one-piece construction prevents tampering.

Charging system features slot loading

MANAGER PAGERS

Guest-paging transmitters can also be used to page any manager wearing these alphanumeric pagers.

1-Line Rechargeable Alphanumeric

- 20-character scrollable display
- Rechargeable NiMH battery
- Variable vibration strength
- Field programmable
- Multiple alert modes
- Out-of-range indicator
- FCC & CE approved

4-Line Alphanumeric

- 80-character scrollable display
- Multiple alert modes
- Auto off/on feature
- Operates on 1 AAA battery
- Out-of-range indicator
- FCC and CE approved

ACCESSORIES

Wooden Slot Coaster Holder

- Solid Oak Construction
- Unstained - can be stained to match decor
- Holds up to 60 coasters

Wooden Drop Box

- Solid Oak Construction
- Heavy Duty Lock
- Engraved front reads "If you are leaving, PLEASE deposit pager here"

CELL PHONE PAGING

Page Guests On Their Cell Phone with the T7450 Transmitter

A Revolution in Guest Paging!

Besides sending a page to all our guest and manager pagers (Page 4), the T7450 Trinity transmitter lets you call a guest's cell phone with a pre-recorded message. It's the perfect solution for locations where pager loss is an issue (malls, waterfront locations, tourist destinations, etc.).

Plus, with the T7450, fewer pagers are needed so you reduce your setup costs of a paging system by 30% — or more.

The T7450 requires a dedicated analog phone line. You record your own personalized message and it is stored in the onboard memory. When you page a cell phone, the pre-recorded message is exactly what the guest hears.

Why You Need It:

- Save 30% or more on the initial startup cost of a guest-paging system
- Reduce the number of lost pagers
- Call guests with a customized voice message
- Leaves a message on your guest's voicemail
- Guest's cell phone number remains confidential
- Ideal for call-ahead seating

System Features:

- Integrated voice modem
- Wireless pager programmability
- Customized text messaging
- Allows a pre-canned voice recording
- Download professional messages from your PC
- Works with all LRS guest pagers (Page 4)
- Built-in clock
- UHF frequency (420 – 470 MHz)
- Operates on 110V or 220V
- T7450 dimensions: 4" x 8" (101mm x 203mm)
- FCC & CE approved

CASUAL & FAMILY DINING

"Your table is ready at..."

Reduce Paging Startup Costs by 30%

Cell phone paging is the perfect way to contact guests in malls, waterfront locations and tourist destinations where pager loss is a concern.

BULLDOG™ PAGER ALERT SYSTEM

NEW!

*Bulldog with flexible
9-foot wire antenna*

Designed especially for LRS server pagers, but it also works with guest pagers in certain applications.

If someone walks within range of the Bulldog carrying a pager, the pager will start to vibrate or flash continuously until it's returned.

Keep a Leash on your Pagers with the Bulldog™

The new and exclusive Bulldog™ is the perfect way to help stop servers and guests from walking off with pagers. Just place this tiny unit over an exit doorway. If someone walks through carrying a pager, the pager will start to vibrate or flash continuously until it's returned.

Bulldog was designed especially to remind servers and staff members to return their pagers to the chargers. But, it can also be used with guest pagers in locations where guests don't normally leave the restaurant while waiting.

Why You Need It:

- Helps reduce cost by keeping LRS pagers from leaving your building
- Reminds employees to return pagers at the end of shift
- Alerts your guests if they forget to return their pagers when leaving
- Helps prevent potential pager theft

System Features:

- Programmable on site
- Adjustable range (up to 15 feet)
- Runs on 15 VDC
- 9-foot flexible wire antenna
- Guest Pager alert modes
 - Vibe & Flash
 - Beep & Flash
- Server Pager alert modes
 - Service Pager: Vibe & Flash
 - Alphanumeric: Beep & Text Message
- Dimensions: 2.4" x 3.4" x .9"
(61mm x 86mm x 22mm)

SERVER PAGING

Keep Your Servers on the Floor Selling More

LRS server paging systems let your servers spend more time with guests instead of waiting in the kitchen for orders. When an order is up, the kitchen staff simply pages the server so they can pick it up. It's that simple. There's no name lookup or shift change to worry about. And, since servers spend more time on the floor, you get higher check averages and faster table turns.

Why You Need Them:

- Widest selection of server paging systems on the market
- Deliver food faster since servers know the moment an order is ready
- Servers spend more time with guests so they can upsell menu items
- Greater guest satisfaction
- Faster service and larger check averages mean better tips for servers
- Simple one-touch operation on all transmitters
- Wireless programmability* lets you re-program pager numbers from the transmitter

System Features:

- UHF frequency for stronger signal penetration of walls and floors (international frequencies also available)
- Rechargeable NiMH batteries last years longer with no "memory" problems
- Duty Page* function automatically notifies staff members about regularly scheduled tasks (check bathrooms, drain dishwasher, etc.)
- Manager Repage* function notifies the manager when a server fails to pick up food after an allotted time has expired (available with cancel panel only)
- FCC and CE approved

*Only on certain models

SERVERS
WITH ONE TOUCH

BUTLER II™

The low-cost, short-range paging transmitter designed for restaurants or bars with up to five servers. This slim unit attaches to almost any surface and has five-buttons. Each button can be programmed to page servers, hosts, managers, etc. with one touch. Battery operated (uses 3 AAA).

Compatible With:

Service Pager
Alphanumeric Pagers

PAGE UP TO
12
SERVERS
WITH ONE TOUCH

T9550LCK

This low-cost paging solution is easy to use and offers simple one-touch operation. It's rechargeable so it can be located anywhere in your kitchen, bar, etc. For larger restaurants, you can use multiple units to page servers from different locations. It includes a built-in dry-erase board so it's easy to change server names each shift.

Compatible With:

Service Pager

CHARGERS

Each charger unit holds five 1-Line Alphanumeric or Service pagers. Charger units are modular and can be connected to charge as many as 25 pagers. Below is a 10-pager configuration.

WITH ONE TOUCH

T9101

This stylish, lightweight design is perfect for any type of kitchen. Chefs will love the built-in clock, one-touch operation and touch-sensitive buttons. Built-in programming pins allow pagers to be programmed on-site without sending back to LRS. For larger restaurants, our T9100 model works with up to 99 pagers (one touch paging with nine, two touch with the rest). Additional features are available when the T9101 or T9100 are used with the T9100CP Cancel Panel.

Compatible With:
Service Pager
Alphanumeric Pagers

T9100CP Cancel Panel

Requires servers to "cancel" their page once they've picked up an order. If they don't, it will automatically re-page two times, then page a manager. It lets you install multiple paging stations in a single restaurant. When a server is paged at any location, their number is displayed on all transmitters instantly. This is the only system with Server Performance Reporting.
NOTE: Requires a T9101 or T9100 transmitter to work.

Compatible With:
Service Pager
Alphanumeric Pagers

SEATING MANAGEMENT

Simplify Your Guest Flow with the Award-Winning Total Control™

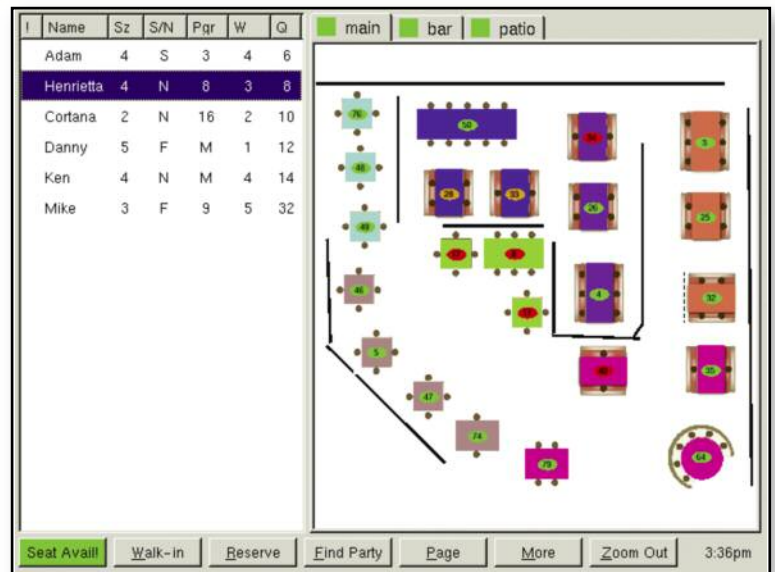

Managing a restaurant is hectic, especially on peak nights. You're constantly monitoring tables, seating guests and updating the wait list. At the same time, you're trying to calm waiting guests, answer the phones and call managers when needed.

Well, we just made all that much easier with the award-winning Total Control™, the most innovative approach to complete guest management ever created. It'll help you maximize guest flow by turning tables faster, improving service and increasing overall guest satisfaction.

Total Control combines table management, advanced seating, guest and staff paging, and wait list management — all in one easy-to-use system!

It also lets you page guests on their cell phones, and it's the only system that lets guests call back to the hostess to cancel or extend their wait.

Plus, it's very affordable! Total Control is the low-cost, all-in-one solution on the market.

See your entire restaurant from one spot with this Table Management Layout.

T7500 - Transmitter

- Complete guest management solution
 - Waitlist management
 - Table management
 - UHF guest and staff paging
- Easy to use
- Most cost-effective table management solution
- Keyboard, Mouse or Touchscreen interface
- Network interface
- "Guest View" monitor interface allows guests to see their names on the wait list
- Promotions and advertising can be displayed on "Guest View" monitor
- Web Control™ software shows wait time at affiliate restaurants (optional)
- Integrated "advanced seating" system (optional)

T7500 Transmitter

WATCH THE VIDEO AT
WWW.PAGER.NET

Total Control can be updated easily with the T7500 transmitter at the hostess stand (left) or remotely from the floor with the T900 handheld transceiver (right).

www.pager.net • 800.437.4996

T901 - Handheld Transceiver

- Dual-function handheld
 - Remote wait list entry
 - Remote table management
- Rechargeable lithium ion battery
- Complete alphanumeric keypad
- Color backlit LCD
- Reliable 2.4 GHz wireless link
- Automatic signal confirmation to and from the T7500
- Compact, rugged design (unlike PDAs)

Total Control™ also works with all LRS guest pagers (Page 4) like the new Alpha-Coaster below, server pagers (Page 8) and alphanumeric manager pagers.

Features & Benefits

Table Management

Total Control lets you see your entire restaurant from one spot. Know which tables are open, closed or being bused from a monitor right at the hostess stand. You can also use the T900 handheld transceiver to update table status remotely so staff won't have to run back and forth to check tables. The T900 makes it easier to transfer parties to different tables, and large parties are less of a hassle, too.

Remote Waitlist Entry

Eliminate host stand congestion by using the T900 handheld transceiver to place guests on the waitlist from anywhere in the restaurant. Ideal for locations with more than one entry or crowded waiting areas.

Reservations

Reservations can be entered up to a year in advance (Page 12).

Click-Ahead™ Seating

Guests can view current wait times right from home and enter their names on the wait list on any Internet-connected computer (Page 13).

Cell Phone Paging (optional)

The 7500 transmitter lets you page guests on their cell phones. And it's the only system that allows them to call back to the hostess to cancel or change their wait time. Cell phone paging also helps prevent lost pagers, and reduces your startup costs by 30% or more.

Guest Paging

Use it to page any LRS guest pager (Page 4) to let guests know their table is ready.

Server Paging

Send a message to a server's LRS alphanumeric pager letting them know the name of the party that has just been seated in their area.

Manager Paging

Send text messages to a manager wearing an LRS alphanumeric pager.

Guest Viewing Screen (optional)

Show names and wait times on a remote monitor so guests won't crowd the hostess stand.

Most Affordable System Available

Absolutely the lowest-cost, all-in-one solution on the market.

Field Upgrades

Upgrades can be downloaded quickly via the Internet so your system is always up to date.

RESERVATIONS

Make Reservations Easily On-Site or via the Internet

Let your guests know they'll have a table waiting before they leave their house. More and more casual dining restaurants are now offering the convenience of reservations to provide better guest service. Now you can, too, with our Total Control™ system (Page 10).

Your staff can add, delete or edit reservations easily right from the host station or from the back office using any Internet-connected computer. Reservations can be made the same day or even up to one year in advance.

Simplicity

The T7500 transmitter is easy to use because it features a step-by-step Reservation Wizard that guides any host or hostess with on-screen prompts. It's simple design sports a graphical calendar display along with a current reservation list making it simple to accommodate guests and reduce over booking.

Security

In addition to being stored within the T7500, all reservation data is also backed up on Long Range System's secure web server. This enables reservation data to be accessed from any Internet-connected PC using a username and password.

Online Reservations

Reservations can also be managed remotely with Total Control's online reservation website. Staff members in the office or even from their own home can access the site with any internet-connected PC.

The data is then instantly accessible by the Total Control system at the restaurant. The online reservation option frees up the hostess to concentrate on in-house guests.

www.clickaheadseating.com

Easy as 1-2-3

WATCH THE VIDEO AT WWW.PAGER.NET

Give your guests the best experience without the wait and they'll keep coming back for more.

1. Guests place their name on your waitlist from any Internet connected computer or PDA

2. Advanced seating is confirmed via the guest's cell phone

3. Guests arrive and are seated promptly

CLICK-AHEAD SEATING™

Let Guests Add their Own Names to Your Waitlist Online

No Labor Required

Unlike call-ahead seating, Click-Ahead Seating by LRS requires no staff involvement. Guests access the website and add their names to your waitlist from their own computer. That way your staff has more time to focus on greeting and seating in-house guests. Plus, since guests enter their own information, it reduces frustration and errors.

Double Your Exposure

Guests can add their names to your waitlist in two ways:

1. *Clickaheadseating.com* lists multiple restaurants according to cuisine and zip code.
2. By linking *clickaheadseating.com* from your restaurant's home page.

Advanced Seating

Using the Click-Ahead Seating database, guests can request "seat times". Unlike reservations, the database monitors the restaurant's waitlist and inserts the guest's name at the appropriate time to assure the requested "seat time".

"Add-Me Now" / "Add-Me Later"

Click-Ahead Seating gives guests the option of adding their name to the waitlist immediately or up to seven days in advance. The "Add-Me Later" option is a great way to plan ahead and reserve a convenient time at popular restaurants.

Cell Phone Confirmation

Before a guest's name is put on a waitlist, Click-Ahead Seating calls their cell phone for confirmation. When they arrive at the restaurant, they check in with the hostess so they can be paged on their cell phone (Page 8) or LRS guest pager (Page 4) the moment their table is ready.

Allegiant

Loyalty Tools by Long Range Systems

ELECTRONIC COMMENT CARD

Get Accurate Feedback from Over 75% of Your Guests

Are you getting feedback from less than 10% of your customer base? Why are you settling for less?

The Allegiant Electronic Comment Card provides instant feedback from 75 to 85% of your guests, EVERYDAY. It's also the only system that lets managers know if a guest enters a negative response *before* they leave the restaurant.

Compare these key features against your current method:

Professional Survey Design

- Custom Surveys that accurately measure the key areas of your operation
- Establishes customer demographic profile
- Increases your Loyalty Club registrations (e-mail marketing available - see next page)

Real-Time Alert Paging

- The only feedback device that alerts you to dissatisfied guests **during** the survey.
- Increase loyalty by resolving guest satisfaction issues on the spot.

Daily Performance Summaries

- Next-day reporting benchmarks current performance and pinpoints problem areas
- Measures Individual Server Performance
- PDF Reports are emailed to your management team each morning
- Data also available in .csv and Excel formats

Plug and Play Solution

- Easy implementation
- Transfers data directly through an analog phone line or high speed internet connection

Mystery Shoppers, Phone Surveys, Paper Comment Cards and Internet Surveys - They only offer a glimpse.

For unquestionable accuracy at an affordable price, switch to The Allegiant Electronic Comment Card.

CASUAL & FAMILY DINING

Email Marketing Tool

State-of-the-art reporting provides detailed performance statistics on every deployment including:

- Deliverability
- Click-Throughs
- Customer Enrollment and much more

Now you have options!

Allegiant Loyalty Tools by LRS has built a better & more affordable fishbowl!

DYNAMIC MESSENGER

Email Marketing Services

Are you looking for innovative ways to gain market share? Dynamic Messenger is the solution you're looking for. We have two options for driving guest loyalty and frequency.

Option One:

Combine Dynamic Messenger with our Electronic Comment Card:

- The Electronic Comment Card solicits your guests for their email address during the survey process.
- Guests receive a branded welcome email the next day that guides them through your loyalty club enrollment.
- Once enrolled, Dynamic Messenger provides the following:

- Automated birthday email with special offer or incentive
- Scheduled promotional campaigns deployed each month
- Online, state-of-the-art performance reports

Option Two:

Use Dynamic Messenger independent of the Allegiant Electronic Comment Card:

- Provide us with your email address lists and Dynamic Messenger will manage your loyalty club deployments.
- Once guests enroll, Dynamic Messenger provides the same features listed in Option One.

Dynamic Messenger — Improving your bottom line through innovative email marketing.

CURBALERT™ CURBSIDE SYSTEM

Add Curb Service with Instant Notification and Real-time Reports

Studies reveal that curbside delivery can increase revenue by over 10%! Restaurants everywhere are adding this convenient service, and now you can add it quickly and easily with CurbAlert™.

With this all-in-one system, you install a video camera and a monitor. That's it! It doesn't require major invasive construction such as loop sensor installation, concrete posts or major electrical wiring.

The camera monitors up to six parking lanes and instantly pages your to-go staff when a car drives up. A monitor inside records how long it takes to greet the guest. If a staff member takes too long, a manager can automatically be paged. That way you make sure guests are always getting the service they deserve.

Why You Need It:

- Simple Installation
- Create a convenient option for guests
- Improve response time with instant notification
- Enhance guest service
- Real-time reporting let you monitor and analyze performance levels, and even compare data from multiple locations (optional)

System Features:

- 15" (381mm) Color LCD and PC all in one unit
- Monitors greet times and total service times
- Daily summary reporting
 - Average greet time
 - Average total service time
 - Number of cars served
 - Percentage of target times met
- One camera monitors up to six parking lanes
- Customizable lane configuration
- Integrated OEM TX Transmitter lets you page staff members with LRS alphanumeric pagers
- Automatic manager paging if service or greet target times are exceeded
- Visual on-screen timer for each lane

CurbAlert Daily Summary Report

Real-Time Performance Reporting

CurbAlert is the *only* curbside system that gives you real-time reports that let you monitor and analyze curbside and server performance levels:

- Get detailed or summary reports
- Daily, weekly, monthly and yearly reports available
- Do store-by-store comparisons for multiple locations (optional)
- Exportable into .CSV and PDF formats
- Printable on standard POS printers

How CurbAlert Works

*Server inside is paged when car arrives.**Server greets customer within moments.**Order is delivered promptly.*

TABLE LOCATOR SYSTEM

Use Key Call™ to Serve Guests Faster with Fewer Food Runners

Stop playing hide and seek with your fast casual guests. Our exclusive Key Call™ electronic table locator system lets you stop wasting time searching for guests by letting you know where they sat before you leave the pickup area.

Why You Need It:

- Reduce labor costs by using fewer food runners
- Turn tables faster by delivering food quickly
- Provide better service to your guests
- Deliver food to the table while it's still hot
- Eliminates "Food Auctions"
- Notifies a manager if orders are delivered late
- Real-time reporting lets you monitor and analyze performance levels, and even compare data from multiple locations (optional)

System Features:

- Simple To Use (see next page)
- Easy-to-read color-coded, time-elapsed Key Call Status Screen
- Key Call Clearing Unit automatically updates Key Call Status Screen
- Works with all LRS guest pagers (Page 4) for takeout guests
- Push-for-Service button lets guests page their server or food runner
- Water-resistant design for outdoor use
- Large spaces on both sides to promote restaurant specials or vendor advertising
- Operates on 3 AA batteries
- Battery life is 6-8 months depending on use
- Low battery indicator
- Dimensions: 4.75" x 5.5" x 4" (121mm x 140mm x 102mm)

Order Keys in Key Holder

www.pager.net • 800.437.4996

HOW IT WORKS

1

In The Restaurant:

a. Guest places their order and is given an order Key by the cashier after it is inserted in Key Call Starter Unit.

In The Kitchen:

b. Order appears on Key Call Status Screen and a timer is started.

Order	Table	Elapsed	Open: 9
40	48	06:03	Top
46	46	05:59	Page Up
15	19	05:59	Page Down
13	41	05:51	<< >>
18	21	05:51	Manager
37	43	05:23	Server

53 [00:49]

ORDER/KEY

TIMER

2

In The Restaurant:

a. Guest inserts the order Key into the Key Call unit located on every table.

In The Kitchen:

b. The Key Call unit at the table communicates with the Key Call Status Screen by adding a table number to the order.

Order	Table	Elapsed	Open: 11
34	11	05:12	Top
35	7	05:11	Page Up
11	49	05:04	Page Down
23	45	05:03	<< >>
38	41	04:59	Manager

MANAGER PAGING

CASUAL & FAMILY DINING

FAST CASUAL

Contact Managers Instantly from Anywhere in the Restaurant

Butler II is the low-cost, short-range system that lets staff members contact managers instantly and silently from different areas of your restaurant, nightclub, etc. This slim, five-button unit attaches to almost any surface. Mount it by the hostess area, behind the bar or anywhere else.

Each of the five buttons can be programmed to page a manager or other staff members wearing an LRS alphanumeric pager.

It can also be used in banquet facilities and meeting rooms so guests or staff members can call for assistance.

Why You Need It:

- Page managers and other staff members instantly and silently
- Enhances guest service by improving staff communication
- Maintains a high-level of staff productivity
- Messaging is detailed and fully customizable
- Easy to install and use
- Affordable
- Eliminates disruptive overhead paging

System Features:

- UHF Frequency
- Wireless
- Durable and user friendly
- Add units to the system at any time
- Battery operated - 3 AAA batteries
- Dimensions: - 1.5" x 7" x .88"
(38mm x 178mm x 22mm)
- Software for custom messaging may be purchased separately

Butler II is the low-cost, short-range system that lets staff members contact managers.

PUSH-FOR-SERVICE PAGING SYSTEMS™

Custom labels available

4" x 1" x 2.75" (102mm x 25mm x 70mm)

Table Genie™

When guests need service, they just press a button and it sends a message to a monitor in the server area. It works in three or single-button mode, and each button can be programmed for specific messages (drink refill, check, manager, etc.).

The system also monitors service response times so you know your staff is always performing at peak efficiency. If a response is late, the system will automatically page a manager. The touchscreen monitor also lets you send text pages to managers or staff members.

Seat	Req	Time	Seat	Req	Time
0	Service	:00	98	Manager	:13
8	Check	:12	123	Service	:31

Low battery indicator

When a button is pressed, it sends a message to a monitor in the server area letting them know which table needs service.

Increase Check Averages by Providing Faster Service

The "push-for-service" name says it all. If your guests need service, they just push a button on these stylish tabletop units and the server is alerted immediately. With Table Genie™ and Coaster Lite™, you eliminate the number one reason for dissatisfied guests: Slow service.

These units help keep your guests happier because they receive better service. They also help maintain a higher level of server performance. Best of all, you earn more by increasing check averages.

Table Genie and Coaster Lite are perfect for low-light environments like night clubs, movie grills, dinner theaters, comedy clubs, bars and much more.

Why You Need Them:

- Sell more food and drinks by increasing check averages
- Ensure faster table turns so you serve more guests in a day
- Maintain a high-level of server productivity
- Better service promotes guest loyalty
- Reduce labor costs since fewer servers are needed to cover the floor
- Better service means higher tips and reduced staff turnover

Coaster Lite™

This simple-to-use unit is a drink coaster that glows at the push of a button. When it lights up, waiters know guests need service. This low-cost solution will pay for itself in less than 30 days.

BEACH BUTLER™

CASUAL & FAMILY DINING

Sell More by Letting Guests Page You From the Pool or Beach

Lying on the beach or sunbathing by the pool, your guests should never have to get up to order food and drinks. With the Beach Butler paging system, they don't have to. They just push a button and it instantly pages a server.

Your guests are happier because they get service when *they* want it. Plus, faster service means you sell more food and drinks.

System Features:

- Sealed, heavy-duty Lexan® casing is 100% waterproof and tamper proof so you can use it virtually anywhere inside or outside
- Multiple Mounting options: Elastic Bands (included), Velcro Bands (included), Brackets and an optional Umbrella Clip
- Up to 9,999 units can be used at one location
- Each unit sends one custom message directly to a pager (no hardwiring required)
- Pages one person or entire groups of servers (up to 99 groups)
- Re-pages from 10 seconds to every 5 minutes (up to 10 minutes maximum)
- Can re-program all LRS pagers on-site
- 2 AA alkaline batteries last 8 to 12 months
- Alerts manager when battery power is low
- Dimensions: 2.75" x 7" x 1.38" (70mm x 178mm x 35mm)
- Colors available: Yellow, Green, Red, Blue, Bone, Grey, and Black. Custom colors also available
- Optional magnet/pen holder for canceling re-pages
- USB interface

100% Water Proof

Optional umbrella clip is one of four mounting options

Custom labels can be added to promote menu specials or vendors

Colors:

Custom Colors Also Available

www.pager.net • 800.437.4996

Beach Butler mounts on an umbrella pole at the beach or by the pool and sends a page to a server when a guest wants to order food or drinks.

Why You Need It:

- **Greater Guest Satisfaction** — “On-demand” service promotes faster service and greater guest satisfaction
- **Sell More in Less Time** — More people can be served in less time, which means you sell more food and drinks
- **Superior Staff Performance** — Instant communication helps dramatically improve staff efficiency
- **Reduced Labor Costs** — Servers know when guests need service so fewer servers are needed per shift
- **Works Inside or Outside** — It’s 100% waterproof, tamper proof and made of heavy-duty Lexan® thermoplastic
- **Multiple Mounting Options** — Metal Bracket, Elastic Bands (included), Velcro Bands (included) and optional Umbrella Clip (mounts on 1” to 1.5” diameter poles)

BUTLER XP™

Provide Faster Service in Hotels, Meeting Rooms and VIP Lounges

Butler XP has the same features and specifications as Beach Butler, but it’s designed to provide instant one-way communication in areas besides the pool or beach — inside or outside.

Benefits

- Guests can contact staff members when they need help or service
- Staff members can contact each other when they need assistance
- Increases food and drink sales
- Enhances guest satisfaction
- Improves staff performance
- Lowers operation and labor costs since fewer servers are needed per shift
- Custom labels can be added to promote specials or vendors

Applications

- **Patio Dining** • **Outside Bar** • **Meeting Rooms**
- **Private Dining Rooms** • **Banquet Facilities**
- **Restaurant VIP Areas** • **Hotel Conference Centers**

The alphanumeric pagers work with both the Beach Butler and the Butler XP systems.

COMPATIBLE PAGERS

1-Line Rechargeable Alphanumeric

- 20-character scrollable display
- Rechargeable NiHM battery
- Variable vibration strength
- Field programmable
- Multiple alert modes
- Out-of-range indicator
- FCC & CE approved

4-Line Alphanumeric

- 80-character scrollable display
- Multiple alert modes
- Auto off/on feature

EZ CARD™

CASUAL & FAMILY DINING

FAST CASUAL

Increase Gift Card Sales without Interrupting your Staff.

Make purchasing gift cards faster and easier for guests and you with EZ Card™. This self-service automated unit lets guests purchase cards of any amount anytime without interrupting your staff.

Just mount it on a wall or place it on a bar or counter. Its distinctive look and video graphics will grab attention easily. EZ Card can also collect email addresses so you can let guests know about new products and promotions.

Simple to use:

1. Guest swipes their credit card
2. They select the amount of the gift card
3. Credit Card is approved
4. EZ Card dispenses the gift card

Why You Need It:

- Promotes impulse purchases
- Increases sales and promotes guest loyalty
- Use it to sell more cards at off-site locations
- Reduces labor needed during holiday seasons
- Cards are inside unit which prevents fraud
- Displays up to five video advertisements
- Loaded gift cards may be swiped to determine remaining balance
- Purchased cards can be reloaded at any time
- Includes a survey function that measures guest satisfaction
- Collects e-mail addresses for promotions

System Features:

- Holds up to 250 of your non-programmed cards
- Features a 10.4" Color Touchscreen LCD
- Plugs into your standard ethernet network
- Supports sound
- Includes built-in receipt printer, standard VESA mount and email keyboard
- Set it on a bar or counter, mount it on a wall, or use our optional floor stand
- Multilingual interface available
- Management reports available
- Accepts 110V or 220V
- Displays an alert and pages a manager when gift cards are low
- Size: 25" x 14.5" x 6" (635mm x 368mm x 152mm)

EZ Card can be mounted on a wall or placed on a counter.

EZ Card pages a manager when gift card supply is low.

INTERFACE DEVELOPER'S KIT

PC-BASED TRANSMITTERS

Integrate LRS Products with Your Own POS System

Want to integrate LRS products into your own POS or table management systems? Now you can with these PC-based transmitters.

T74C232 Paging Transmitter

If you are developing application software and would like to interface with a paging system, the T74C232 is just what you need. Everything is downloadable via an RS-232 port. The T74C232 is compatible with all LRS pagers.

OEM TX Embedded Transmitter

This is the perfect fit for any product designer. Its small footprint and simple interface will have you paging in less than an hour. It's a great addition to any design where failure notification is imperative. It can be triggered via RS-232 or up to four contact closures. Each paging message can be configured on the fly by your own microprocessor or you can program the OEM TX to store paging configurations if different events occur. The built-in SMA connector allows for easy antenna placement internally or externally to your equipment. The OEM TX may be purchased as "board only" or in the case with antenna.

Table Management Handhelds

Easily integrate LRS handhelds into your existing table management software. A simple RS-232 is all that is required to allow hostesses to remotely enter table numbers into your software. These durable LRS handhelds won't walk away like PDA's and they have a far greater operating range. System consists of an RT1201F Receiver and T12C Transmitter. Up to 100 handhelds can also be used in the same location.

ALL-INCLUSIVE WARRANTIES

ManagedCare

The first loss-replacement pager program that automatically ships guest pagers on a monthly basis for systems currently covered under the standard warranty. This program is designed to help managers maintain paging system par levels.

EasyCare

The best way to maintain your guest paging system! EasyCare is the first combined lifetime warranty and loss-replacement program for your guest paging system. This plan is designed for two purposes: First, it provides a lifetime warranty for guest paging equipment currently out of warranty; Second, it automatically ships guest pagers on a monthly basis to help keep paging systems at appropriate par levels.

ServerCare

The first, all-inclusive lifetime warranty plan for your server-paging system. This includes advanced replacement on all server-paging equipment, discounts on replacement server pagers and of course, a lifetime warranty. This program was designed for restaurants who rely on server paging as operation-critical equipment and insist on advance replacement of pagers and transmitters.

Speak to one of our friendly experts 24 hours a day, all year round.

Protect These Superior Products with Superior Warranties

We've always offered the highest quality products on the market, so it makes sense that we would offer the highest quality warranties to back them up. And we do. LRS provides an all-inclusive warranty on every product we make.

Plus, we were the first to offer a combined extended lifetime warranty and loss-replacement program. These programs have done such a great job of meeting customer needs that they are now industry standards.

24-Hour Customer Support

Customer support is available all day every day from the friendly experts in our home office in Dallas, Texas. We'll answer any questions you have about all our products. Even on holidays!

Why You Need LRS Paging Systems

Experience

Since 1993, LRS has been the leading supplier of on-site guest and staff paging and management systems by providing the most effective solutions and listening to the needs of our customers. Now we also offer other products designed to increase gift card sales and collect real-time guest marketing data.

Innovation

LRS has 19 patents. We provide over 35 products designed to help you streamline operations, improve service and increase sales every day. We even offer exclusive products and services no other company can.

Tell us what you need and we'll provide a system to help you.

Longer Lasting, Rechargeable Batteries

Our Nickel Metal Hydride batteries on all our rechargeable pagers last much longer (around five years) and don't suffer from "memory" problems like other pagers. No need to turn them off and no more dead pagers.

Anti-Theft Mode

There is also a reminder tone in our pagers that lets you know when a pager is taken from your restaurant. LRS transmitters can also automatically send out a signal to locate any lost pagers within your building.

UHF Technology Increases Range

Even the largest restaurant operations can use our pagers. We utilize Ultra High Frequency (420-470 MHz) technology that provides the best range and reliability available in a pager. This technology gives you a range of up to one mile — far superior to a 27 MHz system.

Quality

LRS is an engineering and manufacturing company. All of our products are designed and assembled by us. We closely control quality, and we design pagers with features that are important to you.

Durable and Rugged Pagers

Our rechargeable pagers have no directly attached clips to break off. They're made of extremely durable Lexan plastic to survive even the most rugged environments.

Separate Pager Holsters

Instead of attached belt clips that break easily, our rechargeable pagers are carried in separate pager holsters. This eliminates broken belt clips as well as the need to return an entire pager for repair.

Value

LRS has always been the leader in value-driven products. We guarantee the most features for the greatest value. Plus, when you factor in your increase in sales due to improved guest satisfaction and staff productivity, our pagers are virtually priceless.

24/7 Customer Support

Our customer service department in Dallas, Texas is available 24 hours a day, 7 days a week to answer any questions you may have — even on holidays!

Warranties

We stand behind the quality of our products and provide a standard warranty. Extended and lifetime warranties are also available (see page 27).
