

# AQUA™

## THE FIRST WATERPROOF & ANTIMICROBIAL GUEST PAGER

Long Range Systems is proud to offer the newest addition to our paging line - AQUA. Being the first **WATERPROOF\* & ANTIMICROBIAL** pager, AQUA is the world's most durable pager. AQUA prevents passing germs by killing them instantly on contact.

The AQUA also features **DOUBLE-SIDED ADVERTISING** allowing you to promote more specials than other pagers. With AQUA, you can display your daily specials on one side and Happy Hour times on the other.

Don't be fooled by VHF systems. AQUA is pure UHF giving you the best range through walls and ceilings that will not interfere with wireless sound systems. UHF is the preferred frequency for better signal penetration ensuring your guests will be notified without dropped pages.

When paged, the AQUA pager continues to vibrate and flash unlike the competition which stops and can be missed by the guest. The continuous flash/vibe also ensures the lowest pager loss rate in the industry.

\*Waterproof to 1m depth - not dishwasher safe.

## FEATURES & BENEFITS
