Gift Card Dispenser

Alphanumeric Pager

Increase your gift card sales with the new EZ Card Dispenser from LRS. This kiosk is a self-contained unit that can be mounted to a wall or stand for flexible installation. With the dispenser, your customers will be able to easily purchase gift cards without the assistance of your staff or having to wait in line. Additionally, you can collect email addresses from the dispenser for email marketing and customer loyalty campaigns.

The gift cards in the dispenser are not preloaded with value until the credit card transaction takes place. This makes them virtually useless if lost or stolen.

The EZ Card Dispenser features simple operation:

- Customer swipes their credit card to begin the process
- Customer selects the amount of the gift card
- Credit Card is approved via payment processor
- Customer receives a gift card

Benefits:

- Promotes gift card sales year round
- Sell gift cards through satellite locations such as malls and theaters
- Reduce labor needed during multiple holiday seasons
- Cards can be purchased in any denomination
- Collect email addresses, comments and suggestions at any time
- Provides consumers with a self-service, no-waiting purchase option

Features:

- Holds up to 250 unactivated (no value) gift cards
- 10.4" Color Touchscreen LCD
- Activated cards may be swiped to determine remaining balance
- May be reloaded at any time
- Visually alerts as well as pages the manager when card level gets low
- Supports sound
- Plugs into your standard ethernet network
- Included accessories:
 - Built-in receipt printer
 - Standard VESA mount
 - Wall mount bracket
- Multilingual interface available
- Management reports available
- Accepts 110V or 220V
