LRS is the leader in fast casual paging solutions. Two things make LRS the best choice: Durability and Service. Paging systems can take a beating in a fast casual environment and we've engineered our pagers to be industrial strength for premium performance. Should you have any problems or questions about your LRS paging system, our Customer Service is unsurpassed with 24/7 free technical support. Combine our durability and service with the fact that our systems don't cost a fortune and you'll see why LRS remains leader.

**Coaster Call (Non-Programmable)**
**Dimensions: 4" x 4" x .75"**

## Guest Pagers:

**Coaster Call®** — The world's first UHF pager in a coaster! Its design is virtually indestructible. Often copied, never duplicated.

**Pizza Pager** — The latest pager design created to compliment any pizzeria or Italian concept

## Transmitter:

**T7400A** — UHF transmitter used with all LRS Pagers

**Pizza Pager (Non-Programmable)**
**Dimensions: 5" x 5.5" x .75"**

## Benefits:

• **Quiet Atmosphere** – Overhead paging is eliminated, encouraging business people and others seeking a quiet atmosphere to dine at your restaurant.

• **Eliminate Counter Congestion** – Allow guests to relax while waiting rather than hovering around the pick-up counter.

• **Improved Food Delivery** – Guests are able to pick up their food quickly without having to fight the "swarm" normally found around the pick-up counter.

## Features:

• **UHF FM Frequency** – For greater range

• **Nickel Metal Hydride Batteries** – For longer charge life (3x longer than NiCad)

• **We ARE the manufacturer.** We build our pagers to be durable and water-resistant.

• **Various Paging Modes** – Flash, beep, vibrate, and glow.

• **Restaurant ID Codes** – Ensures that you will not have interference from other restaurants using paging systems.

• **Built-in Clock & Wait List Timer**

• **Free 24/7 Technical Support**

**T7400A Transmitter**
**Dimensions: 8" x 4" x 3.75"**
